## Personal Projects

---

January 2023

### Project: FoSoScore

**Description:** Developed an interactive web application called FoSoScore that allows users to track and compare football scores in real time. The application provides live updates, team statistics, and match highlights.

**Technologies:** JavaScript, Bootstrap

**APIs:** Integrated Rapid API for retrieving real-time football data and scores.

<https://github.com/Adhurim4/FoSoScore>

February 2023

### Material-UI

**Description:** Created a responsive and visually appealing web application using Material-UI, a popular React component library. Implemented various UI components, such as buttons, cards, and navigation menus, to enhance the user experience and improve the overall design.

**Technologies:** React, Material-UI

<https://github.com/Adhurim4/material-ui>

February 2023

### Movie App

**Description:** In the movie application developed using React, I have implemented a search functionality that allows users to search for movies. The application leverages an API to retrieve movie data based on user search and displays the relevant movie.

**Technologies:** React, API integration

February 2023

### Real Estate App

**Description:** Developed a real estate application using React and Tailwind CSS. The app features property listings, search functionality, filtering options, and detailed property information. Designed a modern and intuitive user interface with responsive layouts using Tailwind CSS utility classes. Utilized the useContext hook from React for efficient state management and seamless data sharing between components.

**Technologies:** React, Tailwind CSS

<https://github.com/Adhurim4/real-estate-starter>

February 2023

### Youtube Clone Project

**Description:** Built a YouTube clone application using React and Material UI, replicating the core features and user interface of the popular video-sharing platform. Leveraged the Rapid API to fetch video data and implemented functionalities such as video playback, search, and recommended videos.

**Technologies:** React, Material UI, Rapid API

March 2023

## Crypto App

**Description:** Developed a crypto application using React, Redux, and Ant Design. The app provides real-time cryptocurrency information in a visually appealing and user-friendly interface. Implemented state management and data flow using React and Redux, ensuring a seamless user experience. Designed a modern UI with Ant Design's pre-built components.

**Technologies:** React, Redux, Ant Design

May 2023

## Blog

**Description:** Developed a blog application using Next.js and React.js, powered by GraphCMS and GraphQL. Implemented features such as article creation, editing, and publication and commenting functionality. Designed the user interface with Tailwind CSS to achieve a responsive and visually appealing layout.

**Technologies:** Next.js, React.js, GraphCMS, GraphQL, Tailwind CSS

May 2023

## Bank Application

**Description:** Developed a banking application using React, and Figma, with Vite. Designed the user interface using Figma to create an intuitive and user-friendly banking experience.

**Technologies:** React, Figma, Vite

[https://github.com/Adhurim4/bank\\_vite\\_figma\\_react](https://github.com/Adhurim4/bank_vite_figma_react)

April 2023

## Personal Portfolio Website

**Description:** Developed a personal portfolio website using React and Tailwind CSS. The website showcases professional experience, skills, projects, and contact information in a responsive and visually appealing layout. Implemented form validation for the contact form using the useForm hook from react-hook-form. Designed a modern and polished UI using React components and Tailwind CSS classes.

**Technologies:** React, Tailwind CSS

## Work Experience

### Front-end Developer

December 2019 – May 2020

#### Posta e Shpejte 007. – Prishtina, Kosovo

- Postal Order Management System
- Developing the Front-end in HTML, CSS, and JavaScript
- Maintaining and improving the website
- Communicating directly with the customer
- Integrate with back-end APIs

### Android Developer Intern

April 2018 – September 2018

#### Frakton – Prishtina, Kosovo

- Developing mobile applications
- Integrate with back-end APIs
- Analyze the specifications and functionalities
- Propose the best technical solution
- Integrate the notions of gamification in each development
- Maintenance of the applications
- Test the product as well as ensure performance levels

#### Main Projects:

- Crypto Alert
- PriFest

## Front-end Developer

March 2017 – April 2018

## DynamicSpheres. – Prishtina, Kosovo

- Creating user-friendly web pages with markup languages such as HTML
- Using CSS to style and layout web pages
- Adding interactive behavior to webpages with JavaScript

## EDUCATION AND TRAINING

### Bachelor's Degree in Computer Science and Engineering

September 2015 – January 2020

### Computer Science and Engineering – University for Business and Technology

- Computer Science – Java
- Algorithms and Data Structures
- Database
- Web developing
- Lab Course
- Software Engineering
- Math

### Trainings

September 2022

### Full Stack Developer– Per Programera

Academind by Ylber Veliu

<https://perprogramera.com/trajtime/full-stack-developer-bootcamp/>

August 2022

### The Complete Web Developer in 2022: Zero to Mastery

Academind by Andrei Neagoie

<https://www.udemy.com/course/the-complete-web-developer-zero-to-mastery/>

January 2022

### Flutter Development Bootcamp with Dart– Udemy

Academind by Dr. Angela Yu

<https://www.udemy.com/course/flutter-bootcamp-with-dart/>

## Personal Skills

### Language

- Albanian– Mother Tongue
- English–Professional

### Technical Skills

- HTML
- CSS
- JAVASCRIPT
- React JS
- Git
- Material UI, Bootstrap, Tailwind
- Next JS
- jQuery
- RESTful APIs
- GraphQL

### Related Skills

- Communication
- Organisation
- Planning and Management
- Autonomous / Teamwork
- Flexibility
- Critical thinking
- Persistency
- Creative thinking
